

POLARTEC® POWER FILL™

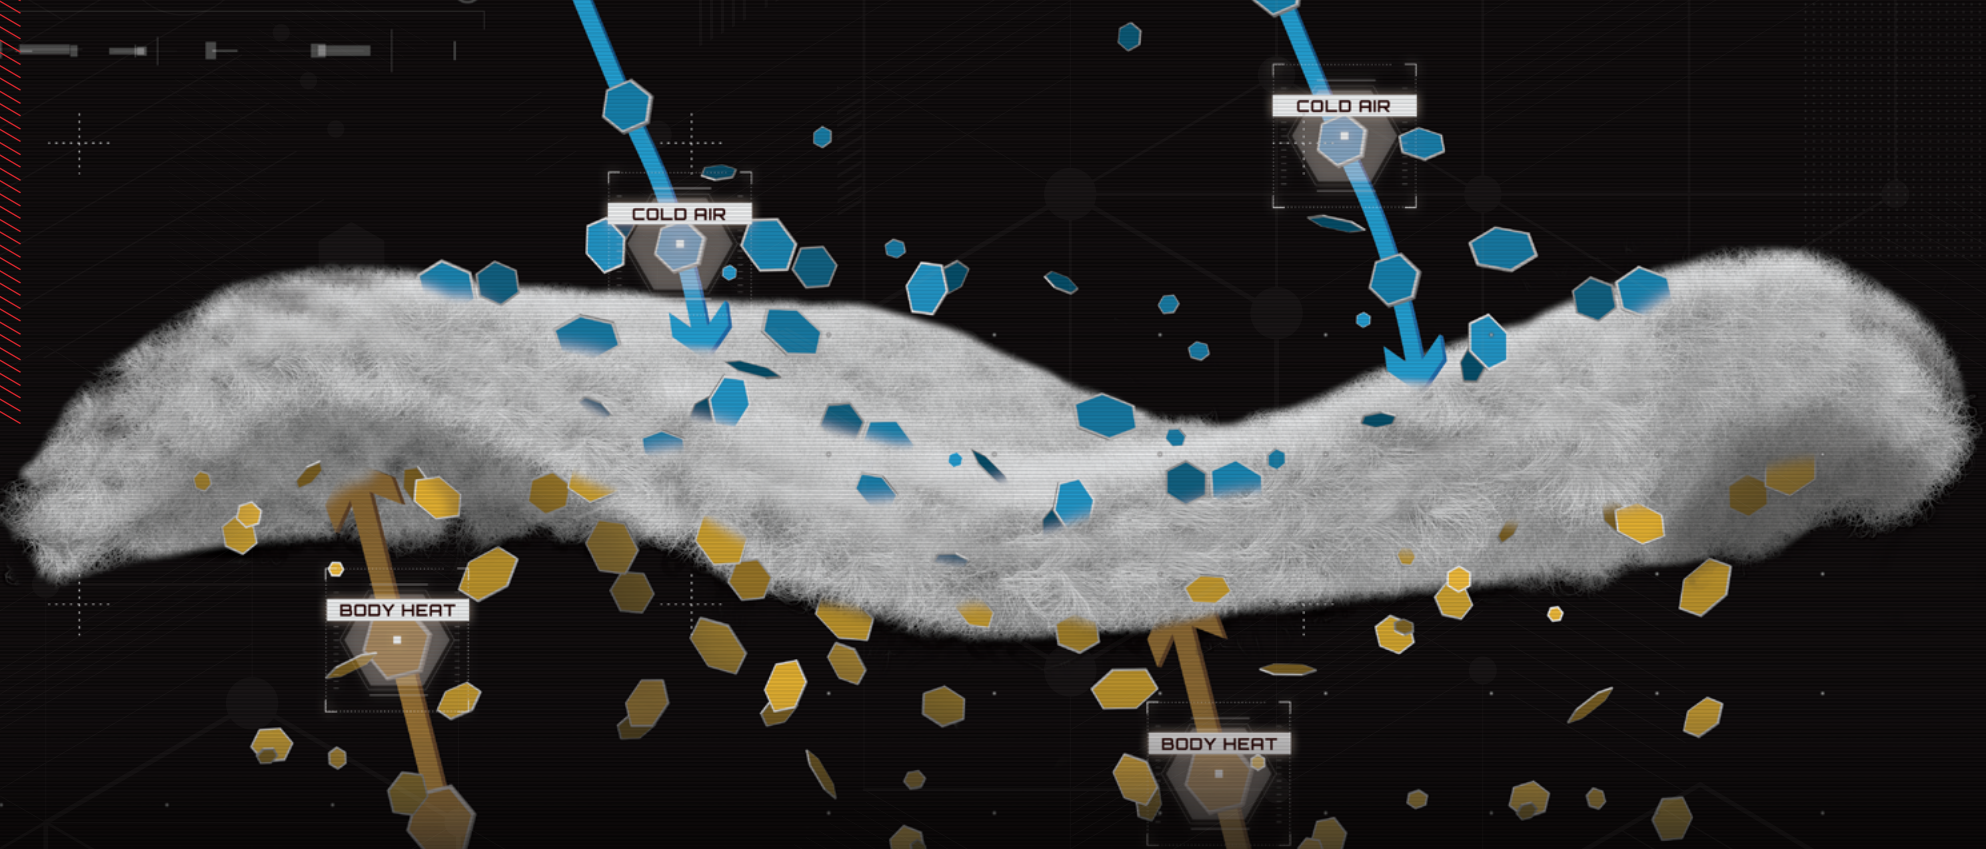

MAXIMUM WARMTH

— SUSTAINABLE COMFORT IN COLD CONDITIONS. —

POLARTEC® POWER FILL™ IS A PREMIUM SOLUTION FOR PACKAGE INSULATION DESIGN NEEDS MADE FROM AN INDUSTRY-LEADING 80% POST-CONSUMER RECYCLED (PCR) CONTENT. This proprietary platform provides greater warmth retention in colder conditions, without added weight or bulk— ideal for a variety of activities where body heat can't ensure proper warmth. A unique controlled melt process bonds the hollow fibers, increasing durability and drapability, reducing the need for scrims or other stabilizers. This gives Power Fill™ unmatched warmth and design versatility, perfect for a wide range of style and usage occasions.

POWER FILL™ FABRIC TECHNOLOGY

FEATURES + BENEFITS:

- | GREATER WARMTH
- | 80% RECYCLED
- | CRUELTY-FREE
- | HYDROPHOBIC
- | DURABLE
- | SOFT + PLIABLE
- | EASY CARE
- | VERSATILE APPLICATIONS

POLARTEC® POWER FILL™ IS A SOFT AND PLIABLE MATRIX OF POLYESTER FIBERS ENGINEERED WITH A DISTINCT GEOMETRIC SHAPE. This matrix forms thousands of small air pockets that continuously capture and contain body heat, while maintaining a resilient, equalized thermal layer between the colder air on the outside and the warmer temperatures inside. The polyester fiber's inherent hydrophobic properties also work to ensure that Polartec® Power Fill™ resists moisture absorption and dries quickly, while maintaining a high warmth to weight ratio.

- | **MULTIPLE WEIGHTS:** 60G/M² 80G/M² 100G/M² 135G/M²
